NAIROBI

Situated along the Nairobi River in beautiful Kenya, the capital of Nairobi is East Africa's most cosmopolitan city. It serves as an excellent starting point for African safari trips around Kenya. Nairobi is Africa's 4th largest city and is a vibrant and exciting place to be. There are some fascinating attractions: its cafe culture, unbridled nightlife, the National Museum, the Karen Blixen Museum and most notably, just 20 minutes from the city centre, wild lions and buffalo roam in the world's only urban game reserve. Make sure you pay a visit to the elephant orphanage operated by the David Sheldrick Wildlife Trust for a once in a lifetime experience.

LAKE NAKURU NATIONAL PARK

Located in the Great Rift Valley surrounded by yellow acacia woodlands and bushy shrublands, the Lake Nakuru National Park was created to protect the Lake and its large flocks of Lesser Flamingo, which are drawn to the algae that flourish in the saline waters of this soda lake. The national park is inhabited by over 50 mammal species including hippo, black and white rhino, Rothschild giraffe, buffalo and eland. Known as a bird watcher's paradise, the park is home to over 450 bird species. Visitors can look forward to hiking through the scenic landscape, picnicking next to this magnificent lake, and spotting an array of wildlife on a game drive.

LAKE ELEMENTAITA

Elementaita, meaning 'place of dust', is a photogenic, little soda lake situated in Kenya's Great Rift Valley. Famously attracting many visiting flamingos as well as many other birds, it has been named as a World Heritage Site for its prolific birdlife. This is where Kenya's most famous settler Lord Delamere lived and he was responsible for much of Kenya's early agricultural experimentation in this fertile area; it is still inhabited by some of his descendants. The shores are often filled with wildlife and the surrounding forests are perfect for long walks and bird watching. Visitors can look forward to visiting the idyllic Kekopey hot springs, game viewing along the lake's edge, and numerous other activities. Look out for eland, kudu, zebra, gazelle, and warthog families.

LAKE NAIVASHA

Lake Naivasha, in Kenya's Nakuru County, is the highest of the Great Rift Valley Lakes and despite having no outlet, it is one of only two Rift Valley freshwater lakes. Fringed by papyrus and acacia trees, this gorgeous setting is a unique geologic landscape that supports over 450 bird species. The lake serves as the main drinking hole for wildlife in the area such as zebra, eland, hippo, waterbuck, buffalo and many more animals, allowing for some superb game viewing. Visitors can look forward to intriguing night safaris, and boating excursions around the lake as well as to beautiful Crescent Island for spectacular bird watching. Other popular activities include horse riding, village visits and tours to several impressive neighbouring national parks.

CRESCENT ISLAND

Crescent Island Game Sanctuary is located on Lake Naivasha, Kenya in the Great Rift Valley. It is one of the most beautiful parks in Kenya and is Naivasha's best-kept secret. Surrounded by water, it is actually a peninsula and is accessible by boat from East or West as well as by road. From the top of the hill, there is a 360-degree view across the Lake from Longonot to Hell's Gate to the Mau Escarpment to Eburu and onto the Aberdares. Walking along the ridge in the golden hour before sunset whilst watching the animals grazing with the water shimmering beyond is what Africa is all about.

MAASAI MARA NATIONAL RESERVE

One of Kenya's undisputed natural highlights is the Masai Mara National Reserve, which sprawls across more than 1500 square kilometres of the country's southwest. The park protects a phenomenal array of game, including elephant, lion, leopard and buffalo, as well as crocodile and hippopotamus in the Mara River. The birdlife is no less impressive, with over 450 resident bird species. However, the true highlight here is the Great Migration, recognised as one of the Seven New Wonders of the World. To survive the dry months of July to September, some 1.7 million wildebeest, migrate from the parched plains of the Serengeti National Park in Tanzania. Along with much smaller numbers of antelope, buffalo and zebra, they move to the more forgiving grasslands of the Masai Mara. In their wake come predators such as lion, hyena and cheetah, for whom these giant herds are an easy source of prey.
